

`OlxAPILineObj::OlxAPILineObj`

```
graph LR; A[OlxAPILineObj::OlxAPILineObj] --> B[OlxAPILineObj::getG10]
```

The diagram illustrates a call to the `getG10` method from the `OlxAPILineObj` constructor. A light blue box on the left contains the constructor name, and a dark gray box on the right contains the method name. A blue arrow points from the constructor box to the method box.

`OlxAPILineObj::getG10`
